

# Dialog phones and Mitel 470

Flexibility, investment protection, guaranteed future and high availability: These are some of the features that characterize and make Mitel's communications systems outstanding.

The potential of Dialog phones can be fully utilized when these phones are combined with Mitel 470 communication server. Dialog phones are highly appreciated in everyday use because of their excellent quality and multiple functions.

## Mitel Dialog Phones

They combine award-winning design with excellent sound quality and high performance functionality. The dialog phones are also outstanding through their user-friendliness and intuitive operation. This saves the long time spent reading the user's guide: Just connect the phones and enjoy the functions! The Dialog phones are available in classic white or elegant grey color.

### DIALOG 4220 LITE

This compact, economical, digital terminal has all the basic functions required for office communication.

Dialog 4220 Lite is meant for users seeking to deploy traditional telephone functions with excellent voice quality. It is a robust user-friendly phone which can be very easily integrated into visitor or service application environments.

### DIALOG 4222 OFFICE

Dialog 4222 Office is a digital workstation phone which has all the functions required for office communication.

It is extremely user-friendly, with its two line graphic display. In addition the terminal has a hands-free function, a headset socket as well as its own headset key.

### DIALOG 4223 PROFESSIONAL

This digital multi-function model offers extensive, additional system functions making it more convenient for heavy phone users.

The softkeys, the central and versatile operating controls, accompany the user through the contextual menu list.

The freely configurable keys give the user access to convenient team keys, functions or phone numbers.

The team keys show at a glance which team members are currently free/ engaged, or have an incoming or waiting call.

The function keys give simple and direct access to the required functions. It takes just a single key stroke to divert calls or activate a voicemail box!
